AGÊNCIA TOUCH

Projects

Dashboard Ads – Internal Tool

• **Stack:** Next.js, Supabase, Shadcn

• **Analytics** dashboard for tracking Meta Ads & Google Ads performance

• **Reduced reporting and analysis time by 40%**

Touch CRM – Omnichannel System

• **Stack:** Chatwoot, Node.js, n8n, PostgreSQL

• **Centralized** customer communication from WhatsApp & social media

• **Increased lead conversion rate by 25%**

Acresce Dash – Energy Data Dashboard

• **Automated the collection** of consumption data from Cemig using n8n workflows.

• Persisted and structured data in **PostgreSQL/Supabase for analysis.**

• **Built a frontend dashboard** with Next.js for the company to monitor and analyze solar energy consumption in real time.

**Impact:** Reduced manual work, improved data accessibility, and enabled strategic decisions based on clear visual analytics.

gabe-dev

gmoraes355@gmail.com

For the past 2.5 years, I've been sharpening my web development skills, focusing on technologies like **React, Next.js, Node.js, TypeScript, and JavaScript.** My hands-on experience includes creating full-stack web applications, exploring back-end architecture, and deploying projects on platforms like Netlify or in VPS.

Now I'm looking to **grow even more in this area** and keep learning every day!

Tech Stack

My expertise with professional tools allows me to build **scalable applications and deliver high-quality solutions.**

From version control and design systems to automation and deployment, I can ensure clean workflows and efficient development from start to finish.
